

DOT PIN MARKING MACHINE

Specifications:

Marking Area - 6"X4" Inch (150x100mm).

Pin Material - Carbide.

Air Pressure - 5 to 6 Bar.

Marking depth: can mark up to 0.6 mm.

Maximum pin stroke: Up to 10 mm.

Power Supply - 240V.

With compressor inbuilt.

Machine Weight Approx. - 75Kg.

Marking on materials from soft plastics to hard metals up to 60 HRC.
High Speed Marking with operational reliability. Automatically generates Serial numbers, Date, Time, Shift codes, QR Code, etc.
Marking Geometrical Shapes like Square, Circle, Oval, Rectangle. Capable of Marking Customized logos & Vector Images. All system fonts are supported with special logo fonts.

Application:

Gold & Silver Casted Bars, Name Plate, Automobile Components, Heavy Engineering, Pharmaceutical, Aero Space & Defence, Fabrication Engineering, Submersible Pumps & Motors Valves Bearings, Lock & Key and Many more.
